Roentgen Mark Martin

Brampton, ON | 647-216-5701 | mark@roentgenmartin.com

Front-End Web Developer | React + JavaScript | Performance + Accessibility | WordPress

Professional Focus: Build and improve responsive web experiences using React, modern front-end fundamentals, performance optimization, accessibility best practices, API integration, and collaborative delivery workflows.

SKILLS HIGHLIGHTS (5+ years web development)

- Front-end development: Build responsive, user-friendly web interfaces using HTML5, CSS3/SASS, JavaScript, jQuery, React, and TypeScript.
- Performance optimization: Improved load time by 40% through image optimization, bundle reduction, CSS refactors, and front-end delivery improvements.
- Accessibility: Improved accessibility audit scores by 25% using WCAG 2.1 AA practices, semantic HTML, ARIA, Lighthouse, WAVE, and aXe DevTools.
- API integration: Work with REST APIs and JSON across modern web applications.
- Cross-browser quality: Support release quality through cross-browser testing, basic regression testing, and troubleshooting layout or rendering issues.
- Team workflow: Collaborate in Agile environments using Jira, Git, peer code reviews, CI/CD workflows, and documentation handoffs.
- WordPress development: Experience with theme customization, child themes, Gutenberg-based themes/components, reusable page templates, and client-facing website updates.
- Figma handoff: Translate designs into polished, production-ready interfaces aligned to brand guidelines and business goals.

PROFESSIONAL EXPERIENCE

Idea Theorem Inc. - Toronto, ON

Senior Web Developer | May 2024 - Mar 2025

- Built and maintained front-end UI components for React-based and WordPress-driven web experiences, improving delivery speed through reusable code patterns.
- Configured and offloaded media assets to AWS S3 + CloudFront, improving media asset load speeds by more than 50%.
- Improved Core Web Vitals by optimizing images, reducing bundle size, and refactoring CSS, achieving a 40% decrease in load time.
- Applied WCAG 2.1 AA standards using aXe DevTools, WAVE, and Lighthouse, improving accessibility audit scores by 25%.
- Supported front-end delivery across custom themes and content-managed website updates for client projects.
- Collaborated with designers, PMs, and developers in Agile sprints; participated in peer code reviews, iterative releases, and CI workflows.

Junior Web Developer | Jul 2019 - May 2024

- Developed responsive front-end experiences using PHP, HTML5, CSS/SASS, JavaScript, Bootstrap, jQuery, and supporting React work across client-facing websites.
- Customized WordPress themes and page layouts for client sites, resolving styling, performance, and browser compatibility issues across devices.
- Translated Figma designs into responsive layouts across major browsers, reducing QA layout issues by 30%.
- Built reusable UI patterns and modular layout sections to speed delivery and maintain consistency across 10+ projects.
- Supported release quality through cross-browser testing and basic regression testing, resolving 100+ rendering and layout issues.
- Collaborated in Agile sprints using Jira and Git/Bitbucket; participated in code reviews and iterative releases.

CORE TECHNICAL SKILLS

Front-End: HTML5, CSS3, SASS, JavaScript (ES6+), jQuery, Bootstrap, React, TypeScript, TanStack Query
Performance + Accessibility: Core Web Vitals, Lighthouse, WAVE, aXe DevTools, WCAG 2.1 AA, Semantic HTML, ARIA
APIs + Data: REST APIs, JSON, MySQL, OAuth
Backend: PHP, Node.js, MySQL
Tools + Delivery: Git, Vite, NPM, GitHub Actions (CI/CD), Bitbucket Pipelines, Azure DevOps, Docker
Workflow: Agile/Scrum, Jira, peer code reviews, regression testing, documentation and handoffs
WordPress: Theme customization, child themes, Gutenberg themes/components, page templates, plugin configuration, WordPress CLI (WP-CLI)

EDUCATION

Humber Polytechnic - Web Development Program | 2018 - 2019 | Toronto, Canada
Universidad de Dagupan - B.S. Computer Science | 2008 - 2013 | Philippines
